DSE4420 MKII INSTALLATION INSTRUCTIONS

This instruction sheet is for DSE4420 MKII controllers only. For DSE4420 controllers below version 2 use DSE publication 053-056

ACCESSING THE FRONT PANEL CONFIGURATION EDITOR

Ensure the engine is at rest and the module is in stop mode by pressing the stop/reset button. Press the stop/reset and down buttons simultaneously. The configuration icon is displayed, along with the first configurable parameter.

EDITING A PARAMETER

Press to select the required 'page' as detailed in the configuration tables. Press (+) to select the next parameter or (-) to select the previous parameter within the current page. When viewing the parameter to be changed, press the button. The value begins to flash. Press (+) or (-) to adjust the value to the required setting. Press the save the current value, the value ceases flashing. Press and hold the button to exit the editor, the configuration icon will be removed from the display.

NOTE: - pressing and holding the + / - buttons will give auto-repeat functionality. Large values can be changed quicker by holding the buttons for a prolonged period. For instance large timers increment in 1 second steps to 1 minute, then in 30 second steps to 1 hour, then in 30 minute steps.

DIMENSIONS AND MOUNTING

For flat surface mounting in a Type 1 enclosure to meet UL requirements.

DIMENSIONS

180mm x 116mm x 42mm
(7.1" x 4.6" x 1.7")

PANEL CUTOUT

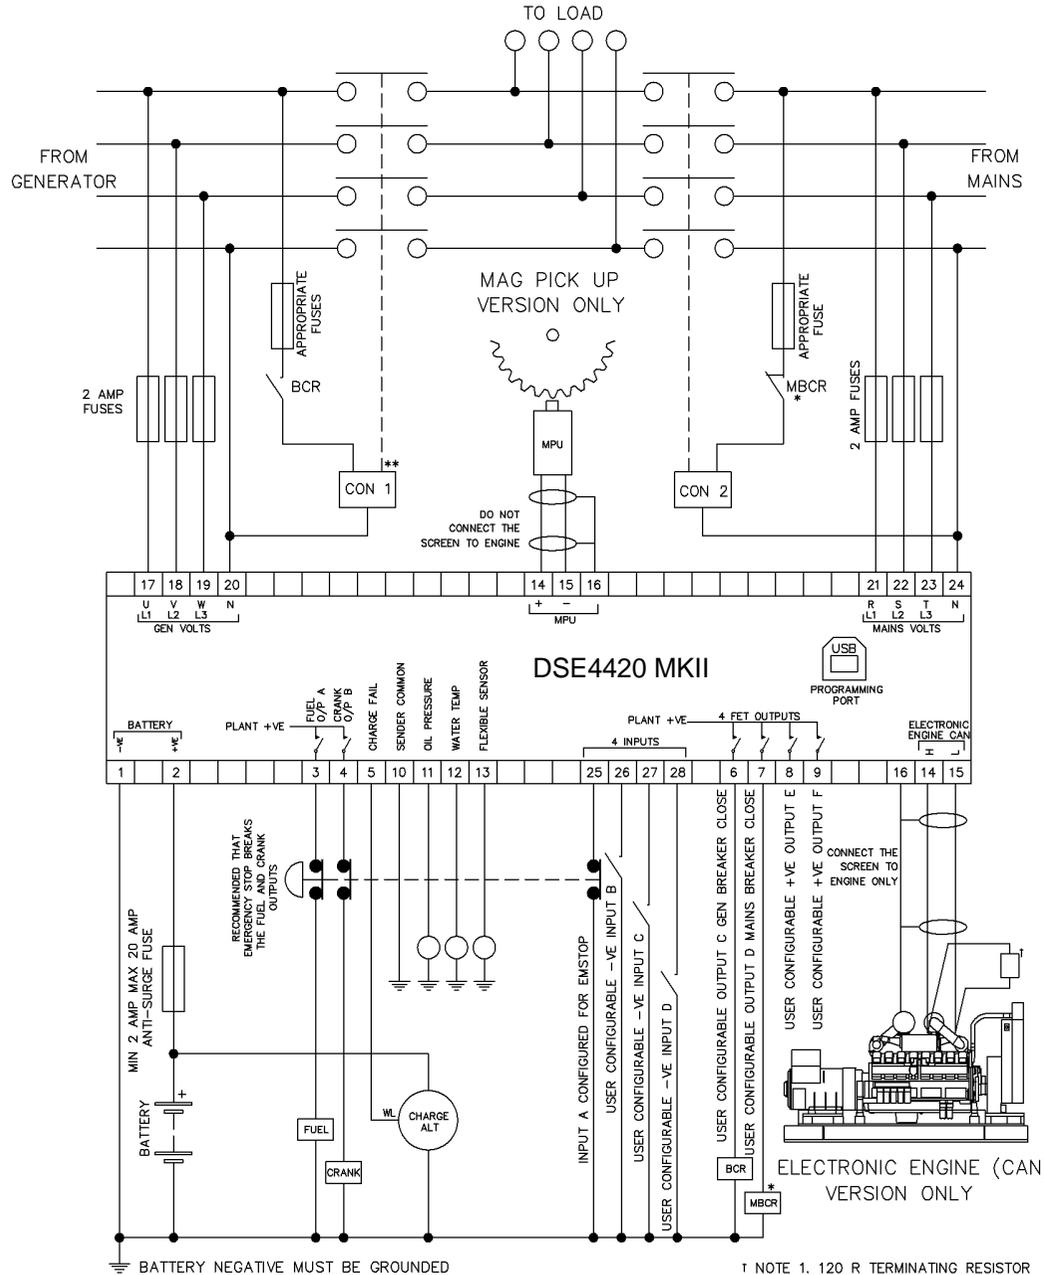

154mm x 98mm
