ACCESSING THE FRONT PANEL CONFIGURATION EDITOR.

- Ensure the engine is at rest and the module is in STOP mode by pressing the Stop/Reset button.
- Press the Stop/Reset and Info buttons simultaneously.
- If a module security PIN has been set, the PIN number request is then shown:
  - Press the button the first digit will flash to enable the pin to be entered.
  - Press (up) or (down to adjust it to the correct value)
  - Press (right) when the first digit is correctly entered. The digit you have just entered will now show "#" for security.
- Repeat this process for the other digits of the PIN number. You can press (left) if you need to move back to adjust one of the previous digits.
- When is pressed after editing the final PIN digit, the PIN is checked for validity. If the number is not correct, you must re-enter the PIN.

If the PIN has been successfully entered (or the module PIN has not been enabled), the editor is displayed:

EDITING A PARAMETER

- Enter the editor as described above.
- Press or to cycle to the section you wish to view/change. Then press to cycle to the parameter within the section you have chosen.

- To edit the parameter, press to enter edit mode. The parameter begins to flash to indicate that you are editing the value.
- Press the up or down buttons to change the parameter to the required value.
- Press to save the value. The parameter ceases flashing to indicate that it has been saved.
- To exit the editor at any time, press and hold the or button.

NOTE: When the editor is visible, it is automatically exited after 5 minutes of inactivity to ensure security.

NOTE: The PIN number is automatically reset when the editor is exited (manually or automatically) to ensure security.

NOTE: More comprehensive module configuration is possible using the 86xx series PC configuration software. Please contact us for further details.

NOTE: The contents of the tables overleaf may differ depending on the actual module configuration.
