ADJUSTABLE PARAMETERS (Factory default settings are shown in bold italicised text)

Section	Parameter as shown on display	Values
Timers	Mains Transient Delay	0-10s (2s)
	Start Delay	0 -60m (5s)
	Transfer Delay	0-10s (0.75s)
	Return Delay	0 -60m (30s)
	Low Battery Delay	0-10m (1m)
	High Battery Delay	0-10m (1m)
Mains	Mains Under Voltage Alarm	50V-360V ph-N (184V)
	Mains Over Voltage Alarm	50V-360V ph-N (276V)
	Mains Under Frequency Alarm	0Hz -75Hz (45Hz)
	Mains Over Frequency Alarm	0Hz -75Hz (55Hz)
System	Plant Battery Under Volt Alarm	0-40V (10V)
	Plant Battery Over Volt Alarm	0-40V (30V)
Misc	Language	ENGLISH, OTHER
	Alternative Frequency	Enable, <i>Disable</i>
	Alternative Voltage	Enable, <i>Disable</i>
	AC System	3phase 4wire, Single phase 2 wire, 3 phase 3wire, 2 phase 3 wire L1&L2, 3 phase 4 wire ED 2 phase 3 wire L1&L3
	Contrast	
	Date and Time	dd mmm yyyy hh:mm
	Auto Scroll Time	0-10s (2.0s)
	Mains CT Primary Rating	5A-6000A (<i>600A</i>)
	Mains CT Secondary Rating	1A, 5A
	Load Ramp Rate	0.1% - 100% (<i>2.0%</i>) (% per sec)

ACCESSING THE FRONT PANEL CONFIGURATION EDITOR

- Press the Stop/Reset o and Info buttons simultaneously
- If a module security PIN has been set, the PIN number request is then shown (The first * is flashing):

- When ✓ is pressed after editing the final PIN digit, the PIN is checked for validity. If the number is not correct, the editor is automatically exited. To retry you must re-enter the editor as described above.
- If the PIN has been successfully entered (or the module PIN has not been enabled), CONFIGURATION is displayed:

EDITING A PARAMETER

- Enter the editor as described above.
- Press the + and buttons to cycle to the parameter you wish to change.
- Press the ✓ button to enter edit mode. The parameter will flash to show edit mode is active (in this instance. "0:02 m:s" is flashing)

- Pressing the + and buttons will adjust the parameter to the desired value. If you have mistakenly changed the value, press the Stop/Reset button once to return the parameter to the previously stored value and exit the edit mode back to parameter selection.
- For date and time editing only: press OO to select between day, month, year, hours and minutes.
- Press the

 ✓ button to 'save' the value. The value will stop flashing to confirm that it has been saved.
- To select another value to edit, press the + button. Continuing to press the + and buttons will cycle through the adjustable parameters as shown overleaf.
- To exit the front panel configuration editor at any time, press the Stop/Reset

 button. Ensure you have saved any changes you have made by pressing the ✓ button first.

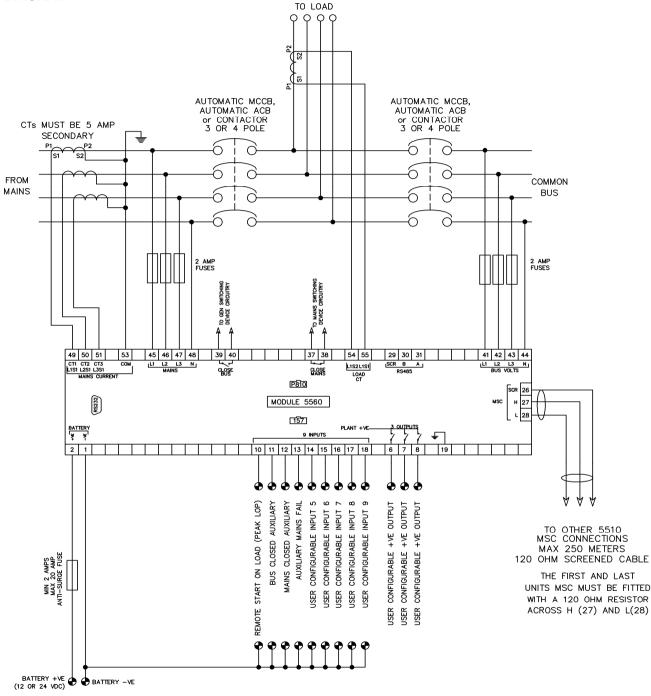

▲NOTE:- When the editor is visible, it is automatically exited after 5 minutes of inactivity to ensure security.

▲NOTE:- The PIN number is automatically reset when the editor is exited (manually or automatically) to ensure security.

▲NOTE:- More comprehensive module configuration is possible using the 5xxx series PC configuration software in conjunction with the P810 PC interface. Please contact us for further details.

ANOTE:- Languages are subject to change as the modules are updated. Please contact us for the list of latest supported languages.
