Product Change Notification:

DSE9474 24 Volt 30 Amp Intelligent Battery Charger

Part No's: 9474-01

DSE9474

New Features

Release Date: 05.03.19	
Added Feature	Feature Explanation
Soft Start.	Configurable as enabled/disabled via the DSE configuration suite software, soft start protects against high inrush currents causing damage when power is first applied.
DSENet [®] Compatibility.	Allows the charger to communicate over DSENet [®] and display charger information on a compatible control modules display.
Deep Sleep Mode.	Significantly reduces power consumption when the charger is not in use. In deep sleep mode current consumption is below 16 mA.
Lithium Ion Profiles.	Allows the charger to be connected to lithium ion batteries.
New Gencomm Register.	A new gencomm register has been added which determines whether the charger is in manual boost.
New Alarms.	An independent reverse polarity alarm has been added.
