DANGER OF DEATH: LIVE PARTS exist within the DSE9476 enclosure. The enclosure cover must not be removed.

INSTALLATION
The DSE9476 is a 24 V, 20 A battery charger which is designed to be mounted within a control panel, utilising the integral mounting holes. The DSE9476 battery charger is fit-and-forget. It may be permanently connected to the A.C. supply and the load, with no requirement to disable the charger during times of heavy load (such as engine cranking) or when in parallel with a charging alternator.

BATTERY SUITABILITY
The charger is factory set by DSE to suit Lead Acid batteries, configuration is possible to suit other battery types using the DSE Configuration Suite PC Software which is available from www.deepseaplc.com. Care must be taken to ensure the batteries connected to the charger are of the correct ‘technology’ to suit the setting of the charger.

INDICATIONS
The DSE9476 Battery Charger features LED indicators to show the battery charger status.
